Summary

As a front-end developer, I build optimized and user-friendly applications using modern technologies. I work with Next.js, React.js, Redux, and TypeScript to create high-performance web solutions.

Experience

LLC “Za Rulem”, Frontend Developer

June 2020 – present

Achievements:

Legacy Code Migration: Successfully migrated the website's codebase from outdated technologies to a modern stack, improving maintainability, scalability, and future-proofing the application.

Implemented SSR and SSG: Implemented Server-Side Rendering (SSR) and Static Site Generation (SSG), resulting in improved website performance and accessibility for users.

Responsive Website Version: Developed a responsive (mobile-first) version of the website, enhancing user experience and eliminating code discrepancies between mobile and desktop devices.

Improved Core Web Vitals: Achieved a 100% improvement in Core Web Vitals (CWV) scores, significantly enhancing website performance and user experience.

Enhanced SEO Metrics: Improved SEO metrics, increasing the website's visibility in search engines.

Responsibilities:

SPA (SSR+SSG) application development (Next.js/ React, Redux, Typescript);
Current site maintenance (Google Closure, node.js); Integration of GTM and analytical systems; Email newsletter creation; Code review
